Ever wondered how well you'd professionally vibe with someone on LinkedIn? LinkedIn Cupid is a fun Chrome extension that helps you find out! It compares key details from two LinkedIn profiles you're viewing and gives you a "vibe match" score.

How It Works - It's Simple!

LinkedIn Cupid is designed to be super easy to use:

- 1. Open LinkedIn Profiles:** Navigate to the first LinkedIn profile you want to analyze.
- 2. Load Profile 1:**
 - Click on the LinkedIn Cupid extension icon in your Chrome toolbar.
 - In the popup, click the "Load Data from Current Page" button under "Profile 1."
 - The extension will grab some key details like name, headline, current company, and education from the page.
- 3. Load Profile 2:**
 - Now, go to the second LinkedIn profile you want to compare.
 - Click the "Load Data from Current Page" button under "Profile 2" in the extension popup.
- 4. Calculate Vibe Match!**
 - Once both profiles are loaded, the "Calculate Vibe Match!" button will become active. Click it!
- 5. See Your Results!**
 - LinkedIn Cupid will analyze the similarities and show you an overall compatibility percentage.
 - You'll also see a fun heart icon and a little message telling you about your potential professional connection!

What Do the Hearts Mean? 💕

The heart icon and its color give you a quick idea of the match strength:

- 💔 Broken Heart (0% - 50% Match): "Sorry, Try Someone Else!" This means there aren't many strong professional commonalities found based on the data. Don't worry, there are plenty of other profiles out there! Keep networking!

Vibe Match Results

Overall Compatibility:

35%

Shared Education: Both attended **Sharda University!**

Headline Sync: Shared keyword(s) like **student**.

How is the Score Calculated?

LinkedIn Cupid looks for similarities in:

- **Education:** Did you attend the same school?
- **Current Company:** Do you work at the same place?
- **Headlines:** Do your professional headlines share important keywords?
- **Summaries (About Section):** Are there common themes or keywords in your "About" sections?

Each shared aspect contributes to the overall score.

Installation

1. **Download:** Get the extension files from this GitHub repository (you can download the ZIP or clone it).
2. **Unpack:** Unzip the downloaded file to a folder on your computer.
3. **Enable Developer Mode in Chrome:**
 - Open Chrome and go to chrome://extensions.
 - Turn on the "Developer mode" toggle (usually in the top-right corner).
4. **Load Unpacked:**
 - Click the "Load unpacked" button.
 - Select the folder where you unzipped the extension files.
5. **Ready to Go!** You should now see the LinkedIn Cupid icon in your Chrome toolbar.

Disclaimer

- **LinkedIn Cupid is a fun tool for a lighthearted look at professional compatibility. It's based on publicly available (when viewing a profile) information.**
- **LinkedIn's website structure can change, which might occasionally affect how the extension gathers data. We'll try to keep it updated!**

Happy Vibe Matching!
